USA Technologies' Web Service Simplifies Cashless Integration for Micro-Market Offering, Revive Self Checkout

October 3, 2013

MALVERN, Pa.--(BUSINESS WIRE)-- [USA Technologies, Inc.](#) (NASDAQ: USAT), ("USAT"), a leader of wireless, cashless payment and M2M telemetry solutions for small-ticket, self-serve retailing industries, today announced that [Revive Self Checkout](#) ("Revive"), utilizing USAT's Web service, [QuickConnect](#)™, has completed integration of its micro-market offering with USAT's cashless payment and telemetry service, ePort Connect®. Customers of Revive can now seamlessly link their micro-market credit and debit card processing with their other cashless locations supported by USAT to maximize their business processes and technologies.

USAT's [QuickConnect](#) is a Web service that provides developers that already have an application with Internet connectivity and a display mechanism, such as a kiosk or smartphone, with streamlined certification to USAT's PCI compliant, one-stop shop cashless payment service, [ePort Connect](#). Revive is a point of sale technology for micro-market applications, a self checkout-based vending offering geared for areas where fresh produce and similar items are in demand.

Adam Arthur, founding partner and chief developer for Revive, commented, "My approach has always been about providing a feature-rich point of sale kiosk with a flexible architecture that allows the customer to manage service options on their own. As a vending operator myself, I believe our open approach lends itself to the most value for the customer. Since we started selling the Revive Self Checkout in 2011, the number one question we received from customers in this regard was if — and when — the customer could integrate their other cashless vending locations that were utilizing USAT's ePort Connect service with our micro-market solution. Naturally, we are extremely pleased that we can now accommodate those requests.

"Going forward, we are recommending USAT as a preferred solution because they are so easy to work with. I've integrated with a handful of other cashless payment providers and USAT's Web service, QuickConnect, is the easiest credit card provider to setup," said Arthur. "With other credit card providers, you need to fill out lengthy forms and the pricing is often confusing. Our customers love the 'straight forward' approach USAT offers."

USAT's ePort Connect service supports the cashless payment needs for a variety of self-service applications across multiple industries. Recent QuickConnect examples include USAT's new service relationship with Setomatic Systems in commercial laundry and ePortGO™, an integrated dispatch, navigation and mobile payment solution for the taxi and for-hire vehicle industry (see [video](#) on [ePortGO.com](#)).

"We introduced QuickConnect in 2012 to help developers capitalize on the cashless technology trend and the growing demand for self-service as consumers place a greater value on their time," said Cary Sagady, USAT's senior vice president of product management and network services. "USAT's customers benefit from integration options depending on their connectivity requirements, an array of technical support tools and, most importantly, swift access to our PCI compliant, ePort Connect suite of cashless and contactless payment services. QuickConnect is all about helping them develop smarter and faster, with accelerated access to our ePort Connect service."

About Revive Self Checkout:

Revive Self Checkout was founded by Adam Arthur, a computer programmer and owner of Revolution Vending, based in San Diego, California. [Revive Self Checkout](#) is a point of sale kiosk for micro-markets in the food and beverage vending marketplace. Features includes real time bill validator and inventory status, automated condition notifications, remote video feeds, price adjustment options, an advanced rewards system, and a mobile inventory system. To learn more, visit their website at www.micromarketvending.com.

About USA Technologies:

USA Technologies is a leader of wireless, cashless payment and M2M telemetry solutions for small-ticket, self-serve retailing industries. ePort Connect® is the company's flagship service platform, a PCI-compliant, end-to-end suite of cashless payment and telemetry services specially tailored to fit the needs of small ticket, self-service retailing industries. USA Technologies also provides a broad line of cashless acceptance technologies including its NFC-ready ePort® G8, ePort Mobile™ for customers on the go, and QuickConnect™, an API Web service for developers. USA Technologies has been granted 86 patents; and has agreements with Verizon, Visa, Elavon and customers such as Compass, Crane, AMI Entertainment and others. Visit the website at www.usatech.com.

Forward-looking Statements:

"Safe Harbor" Statement under the Private Securities Litigation Reform Act of 1995: All statements other than statements of historical fact included in this release, including without limitation the business strategy and the plans and objectives of USAT's management for future operations, are forward-looking statements. When used in this release, words such as "anticipate", "believe", "estimate", "expect", "intend", and similar expressions, as they relate to USAT or its management, identify forward-looking statements. Such forward-looking statements are based on the beliefs of USAT's management, as well as assumptions made by and information currently available to USAT's management. Actual results could differ materially from those contemplated by the forward-looking statements as a result of certain factors, including but not limited to, the ability of USAT to compete with its competitors to obtain market share; whether USAT's customers continue to utilize USAT's transaction processing and related services, as our customer agreements are generally cancelable by the customer on thirty to sixty days' notice; whether USAT's existing or anticipated customers utilize our cashless payment services in the future at levels currently anticipated by USAT; the ability of USAT to use available data to accurately predict future market conditions, consumer behavior and any level of cashless usage; and the level of demand in the market for USAT's QuickConnect service when integrated with other applications such as the Revive Self Checkout. Readers are cautioned not to place undue reliance on these forward-looking statements. Any forward-looking statement made by us in this release speaks only as of the date of this release. Unless required by law, USAT does not undertake to release publicly any revisions to these forward-looking statements to reflect future events or circumstances or to reflect the occurrence of unanticipated events.
