USA Technologies Strikes an Exclusive OEM Agreement with AIR-serv for ePort(R) G8 Terminals and ePort Connect(R) Services

MALVERN, Pa. & MENDOTA HEIGHTS, Minn., Oct 07, 2008 (BUSINESS WIRE) -- USA Technologies (NASDAQ:USAT), Inc and AIR-serv, the market leader in the coin-operated tire inflation and vacuuming services space, announced today an agreement where Air-serv will enable their kiosks, over the next two years, to accept credit cards with USA Technologies' ePort and ePort Connect Service. Now motorists who pull into gas stations or convenience stores would soon be able to use their debit or credit card operate the kiosks that will to inflate their tires or vacuum the interior of their cars.

Air-Serv is currently presenting the Companies' combined solution at the NACS Show in Chicago, October 4-7. The NACS Show is the most comprehensive annual gathering of retailers and suppliers in the global convenience and petroleum retailing industry.

"Motorists will no longer need to carry coins, or go into the gas station or convenience store to convert bills into change to operate the air compressor or vacuum," said Tom Bauer, President, AIR-serv. "We are installing the USA Technologies e-Port cashless transaction solution on our tire inflation compressors and vacuum machines to give motorists the ease, convenience and speed of being able to use credit or debit cards. The \$140 billion convenience and gas industry has proven that consumers are comfortable using debit and credit cards at the pump and in stores to make small purchases. We are confident that these buying habits will be replicated when a consumer needs to inflate tires or vacuum their cars."

Under the agreement with USA Technologies, AIR-serv will install 10,000 e-Port cashless transaction terminals over the next two years. Installations are expected to begin before the end of the year.

"We are excited that AIR-serv has chosen the ePort G8 terminal and ePort Connect service to introduce cashless payment to what was a cash only, point-of-sale business," said Mike Lawlor, Vice President of Sales, USA Technologies. "AIR-serv is adopting G8 ePort to help them grow their business and enhance customer satisfaction. It further demonstrates the growing versatility of our cashless product line as a proven solution, suitable for all forms of unattended POS cashless transaction activity."

"We believe the proven convenience and online auditing and monitoring capability of the e-Port technology and service will help grow our business, improve our operational efficiency, and enhance customer satisfaction," said Mr Bauer.

AIR-serv believes the e-Port service will not only improve operational efficiency, but will encourage repeat visits by motorists and make more valuable use of the motorist's and gas station and convenience store operator's time.
