Discussion of Non-GAAP Financial Measures:

This press release contains discussion of Adjusted EBITDA, a non-GAAP financial measure which is not required or defined under U.S. GAAP (Generally Accepted Accounting Principles). Generally, a non-GAAP financial measure is a numerical measure of a company's performance, financial position or cash flows that either excludes or includes amounts that are not normally excluded or included in the most directly comparable measure calculated and presented in accordance with GAAP. Reconciliations between non-GAAP financial measures and the most comparable GAAP financial measures are set forth below. However, we do not provide forward-looking guidance for certain financial measures on a GAAP basis because we are unable to predict certain items contained in the U.S. measures without unreasonable efforts.

We use Adjusted EBITDA for financial and operational decision-making purposes and as a means to evaluate period-to-period comparisons. We believe that this non-GAAP financial measure provides useful information about our operating results, enhances the overall understanding of past financial performance and future prospects and allows for greater transparency with respect to metrics used by our management in its financial and operational decision making. The presentation of this financial measure is not intended to be considered in isolation or as a substitute for the financial measures prepared and presented in accordance with GAAP, including our net income or net loss or net cash used in operating activities. Management recognizes that non-GAAP financial measures have limitations in that they do not reflect all of the items associated with our net income or net loss as determined in accordance with GAAP, and are not a substitute for or a measure of our profitability or net earnings. Adjusted EBITDA is presented because we believe it is useful to investors as a measure of comparative operating performance. Additionally, we utilize Adjusted EBITDA as a metric in our executive officer and management incentive compensation plans.

We define Adjusted EBITDA as U.S. GAAP net loss before (i) interest income (ii) interest expense on debt and reserves (iii) income tax provision (iv) depreciation (v) amortization (vi) stock-based compensation expense, (vii) fees and charges, net of reimbursement from insurance proceeds, that were incurred in connection with the 2019 Investigation and financial statement restatement activities as well as proxy solicitation costs that are not indicative of our core operations, and (viii) certain other significant, infrequent or unusual losses and gains that are not indicative of our core operations such as acquisition and integration expenses.
