Record Growth Ranks USA Technologies#6 in US, #26 Globally for POS Terminal Shipments in 2007

MALVERN, Pa., Oct 24, 2008 (BUSINESS WIRE) -- The Nilson Report, the leading source of news and research on consumer payment systems worldwide, has ranked USA Technologies (NASDAQ:USAT) sixth in terminal shipments in the United States, and 26th worldwide in a front-page report.

The October 2008 Nilson Report states that USA Technologies shipped 26,690 ePort cashless payment terminals in 2007, representing a 328 percent increase from 2006.

"Recognition of our performance alongside global giants VeriPhone, First Data and Motorola, further confirms the growing adoption and success of our ePort cashless payment solutions," said George R. Jensen, Chairman and CEO, USA Technologies. "USA Technologies is now an established global leader in providing value-add, innovative solutions that are driving new business in the vending, kiosk and unattended point-of-sale markets."

"In today's challenging business environment, USA Technologies is developing industry-leading solutions that are fulfilling critical market needs -- adding consumer convenience, lowering cost, improving efficiency, while fuelling business growth," said Mr. Jensen. "USA Technologies has experienced four successive record revenue quarters over the past 12 months, and we are seeing growing customer interest in our solutions from the U.S. market and abroad," he said.

The ePort solution offers cashless payment options, from traditional magnetic stripe, to wireless contactless tap-and-go credit/debit cards, pre-paid solutions, and NFC payment using a cellular phone.

USA Technologies received increased interest following the launch last week of two new ePort Terminals, both at lower prices -- the multi-purpose ePort G8 that accepts all forms of payment, and the budget priced ePort Edge for magnetic swipe cards only.
